

Perfect Flow with Dynamic Mixing Head

Constant Flow, Two Part Dispensing System.

Full Performance, Maximum Simplicity, Minimum Price.

The Perfect Flow with dynamic mix head allows difficult to mix materials such as expanding urethane foams to be blended together with enough energy to mix them completely. The Perfect Flow can dispense up to 7# urethane foam parts. Shown with cascading drum rack, shot size control, nucleation air, 80"articulating boom, automatic purge system and ratio sample valves.

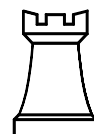

The Perfect Flow stands up to demanding production runs.
