

# Perfect Flow

Mixes two or three part resins!

Perfect for finger jointers, roll-coaters, edge gluing, or anywhere you need accurate dependable metering

Tough enough to run for multiple shifts!

Dual action, pumps for constant flow.

High volume output!

Accurate metering!

Easy slide ratio adjustment.

A simple, yet highly capable, dispensing machine, the Perfect Flow is powered by an air cylinder operating two abrasive resistant, double acting piston pumps. The pumps deliver a constant flow of accurately metered fluid to the static mixer, where they are blended to gather.

The Perfect Flow requires little maintenance and cleanup is easy. The simplicity of the Perfect Flow allows us to produce it for a fraction of the cost of more complex machines, and reduces maintenance cost and down time as well. The perfect flow is also extremely customizable with many options available including heaters and a variety of controls.

This powerful and efficient machine should be in your shop!
