## SUPER E

Two Part Potting System

Now available with:  
Encoder Based  
**Electronic Shot  
Size control**

**Unparalleled ease of use**

- Highly accurate
- Low shot to shot variability
- Easy to adjust

### **A compact, yet highly capable, dispensing machine.**

Delivers accurately metered material through a static mix head. Highly accurate encoder based shot size control. Straight forward simple to adjust operator interface. Output adjusts down to 1/2cc and can adjust up in as little as 1/10cc increments to a full continuous run. Timed shot mode allows repeatable dot sized shots. Auto repeat function allows pacing of work. Purge timer keeps mixers working. Easy slide ratio adjustment, ratios from 6:100 to 1:1 are available. Will dispense out of 55-gallon drums, totes, pressure pots or 5 gallon reservoirs. Ready to do your potting, encapsulating, rotational molding, or anywhere shot sizes must be controlled.

### **Simple, Dependable, Economical**
